EXPERIENCE

Tulipspot Pvt. Ltd.: software engineer intern (frontend intern)- (html5, css3, javascript, react.js) Jan 2024-June 2024

- I collaborated closely with the team to seamlessly integrate **CRM**, enabling content management in **real-time** and enhancing **user engagement** and satisfaction.
- Acquired proficiency in both **server-side** and **client-side** rendering techniques, optimizing **web performance** to achieve a flawless **user experience** across all devices.

PROJECTS

ADVANCED VIRTUALITY & SPA MAINTAINANCE SYSTEM : <https://anvimakeover.in> August 2023-April 2024

- The project will explore the development and implementation of a comprehensive spa website aimed at revolutionizing the traditional spa experience through the incorporation of advanced virtual makeup options.
- Central to the user experience enhancement is the integration of a cutting-edge virtual makeup feature, which empowers users to digitally experiment with different cosmetic options in real time.
- Leveraging the power of computer vision and machine learning, users can effortlessly modify their hair, lips, and eye colours with precision and accuracy, thereby enabling them to visualize and personalize their desired look before committing to a physical makeover.

PORTFOLIO: - [View on GitHub](#) July 2023-August 2023

- My portfolio is a selection of my work, showcasing my expertise in HTML5, CSS3, JavaScript, and Bootstrap.

WEATHER APPLICATION : (API, html5,css3,javascript)- [View on GitHub](#) January 2023

- Users will be able to access current weather information via the weather application. They can make better decisions regarding their daily activities with the aid of forecasts and additional weather-related data.
